PROFILE

Cloud Engineering student with a strong interest in the intersection of technology, data systems, and human behavior. Experienced in cloud infrastructure, security monitoring, and system automation. Interested in applying technical skills to research environments, particularly in data handling, system reliability, and AI-related applications. Motivated to bridge technical systems with research and real-world human-centered applications.

PROFESSIONAL EXPERIENCE

Cloud & Security Engineering Intern

Flexos Tunisie

08/2025 – 10/2025

Tunis, Tunisia

- Assisted in deploying and maintaining Linux-based cloud environments for security and monitoring systems
- Supported configuration and operation of containerized services using Docker
- Contributed to system monitoring pipelines and log management workflows
- Participated in infrastructure troubleshooting and environment validation

Innovation Intern (International Program)

PVG University

06/2025 – 08/2025

Pune, India

- Supported DevOps-oriented workflows for enterprise data and reporting systems
- Assisted in monitoring and validating data processing pipelines and system processes
- Contributed to technical documentation of infrastructure and system workflows
- Gained exposure to enterprise DevOps practices, CI/CD workflows, and operational IT environments

Data/Consulting Intern

Devoteam

06/2024 – 08/2024

Ariana, Tunisia

- Supported DevOps-oriented workflows for enterprise data and reporting systems
- Assisted in monitoring and validating data processing pipelines and system processes
- Contributed to technical documentation of infrastructure and system workflows
- Gained exposure to enterprise DevOps practices and operational IT environments

EDUCATION

Engineering Degree in Computer Science (Cloud Engineering)

ESPRIT

09/2021 – Present

Ariana, Tunisia

Academic Exchange

Philipps-Universität

10/2025 – 12/2026

Marburg, Germany

SKILLS

Cloud Platforms — AWS (EC2, IAM) | OpenStack, **DevOps & Automation** — Docker | Kubernetes | Terraform | Ansible | Jenkins (CI/CD), **Operating Systems** — Linux (Ubuntu, Debian) | Bash scripting, **Monitoring & Security** — Wazuh | OpenSearch | Suricata | Zeek | TheHive | Cortex, **Programming** — Java | JavaScript | Angular | Spring Boot, **AI / Data** — REST APIs | OpenAI API, **Virtualization** — Proxmox VE, VMware ESXi

CERTIFICATES

Nutanix

Nutanix Certified Professional

AWS

AWS Cloud practitioner

LANGUAGES

German

A2

English

(C1 IELTS Academic 7.0)

French

C1

Arabic

Native language

PROJECTS

SOC/EDR/SIEM – Multi-tenant Cybersecurity Infrastructure

Flexos

08/2025 – 12/2025

- Designed and deployed a cloud-native security monitoring infrastructure integrating Wazuh, OpenSearch Security Analytics, Suricata, Zeek, TheHive, and Cortex
- Implemented automated infrastructure deployment using Terraform and Ansible
- Built log aggregation pipelines and structured data workflows for monitoring and analysis
- Developed basic incident monitoring and response processes
- Deployed and orchestrated services using Docker and Linux-based environments

Espr'Eats – Cloud-based meal ordering system

ESPRIT

10/2024 – 05/2025

- Built a cloud-native web application using Spring Boot and Angular
- Deployed infrastructure using OpenStack, Kubernetes, Terraform and Ansible

INTERESTS

Sports — Ironman preparation, marathon running, swimming, cycling, boxing, horse riding | **Travelling** | **AI** | **Human behavior**
