Ismail Triki

Cloud & DevSecOps Engineer | Kubernetes, IaC, Security Automation, AWS
Marburg, Germany | ismail.triki.2020@gmail.com | +49 155 11402930
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Cloud engineer (Computer Science, 2026) who builds secure, automated cloud platforms from design to deployment. Delivered a Kubernetes-based SOC platform with automated detection and response, and CI/CD pipelines with built-in vulnerability scanning, SBOM and image signing. Consulting exposure at Devoteam supporting a banking client on infrastructure risk and business continuity. Experienced in international teams (Germany, Tunisia, India). Based in Marburg.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS, OpenStack, Proxmox VE, Linux, networking

Infrastructure as Code & CI/CD: Terraform, Ansible, AWX, Jenkins, GitHub Actions, Git, Bash

Containers & Observability: Kubernetes, k3s, Helm, Docker, containerd, Prometheus, Grafana

Security: Trivy, Syft, Cosign, SBOM, Bandit, pip-audit, Wazuh, Suricata, TheHive, Shuffle SOAR, MITRE ATT&CK

Programming & Scripting: Python, Java, SQL

Ways of Working: Agile/Scrum, Git-based collaboration, technical documentation, client communication

EXPERIENCE

Cloud Engineering Intern – DevSecOps & Security Automation **December 2025 – June 2026**
Flexos Tunisie *Hybrid - mostly remote from Germany*

- Designed and delivered a self-managed SOC platform on a three-node Kubernetes (k3s) cluster (Proxmox VE).
- Automated provisioning and deployment end to end with Terraform, Ansible, AWX and GitHub Actions.
- Built a detection and response chain: Wazuh and Suricata feeding automated case handling in TheHive and Shuffle SOAR.
- Engineered MITRE ATT&CK-mapped detections (SSH brute force, network reconnaissance, account discovery); SSH attacks were detected and contained in under 4 seconds in controlled testing.

Cloud & DevOps Intern – International Innovation Program **June 2025 – August 2025**
PVG University / AIESEC *Pune, India*

- Co-designed Vocallia, a cloud voice-app prototype (APIs, backend, speech processing), in a multicultural team; Top 10 at OSTX Tunisia 2025.

Cloud, Data & DevOps Intern **June 2024 – July 2024**
Devoteam (technology consulting) *Ariana, Tunisia*

- Supported a banking client engagement by documenting infrastructure and operational risk: service dependencies, availability, security controls and business continuity.

SELECTED PROJECTS

DevSecOps Deployment Tracker – Personal Project **2026**

- Built a secure software supply chain for a containerized Flask service: automated tests (pytest) and quality and security gates (Ruff, Bandit, pip-audit) that block the build on failure.
- Jenkins pipeline scans images with Trivy, generates an SBOM with Syft and publishes to GHCR, then signs and attests image and SBOM with Cosign and verifies both after release.
- Packaged the service as a Helm chart and Kubernetes manifests for k3s, with readiness and liveness probes and resource requests and limits.

Cloud & DevOps Infrastructure, ESPRIT **2024 – 2025**
Academic Project *Ariana, Tunisia*

- Provisioned OpenStack with Terraform and Ansible; ran Spring Boot and Angular services on Kubernetes via CI/CD.

EDUCATION

Business & Engineering / International Business with Engineering (IBE) **October 2026 – Present**
Technische Hochschule Würzburg-Schweinfurt (THWS) *Schweinfurt, Germany*

Engineering Degree in Computer Science (Diplôme d'ingénieur) **September 2021 – July 2026**
ESPRIT *Ariana, Tunisia*

Specialization: Cloud Engineering | Final-year thesis: Cloud-Native SOC Platform Design & Deployment | Thesis grade: 16.88/20

CERTIFICATIONS

AWS Certified Solutions Architect – Associate – Amazon Web Services
AWS Certified Cloud Practitioner – Amazon Web Services
Nutanix Certified Professional – Multicloud Infrastructure 6 (NCP-MCI 6) – Nutanix
